

▲ ACE XP™ For Long-Life Parking Lots

We utilize one of the strongest man-made fibers in the world to create innovative solutions that help make asphalt mixes stronger, last longer, and cost less over the pavement's lifespan.

Performance

- Reduced cracking by 30-50% on Ideal CT
- Improved rutting up to 15% on HWT/IDRT/AMPT
- Extends pavement life up to 100%

Ease of Adoption

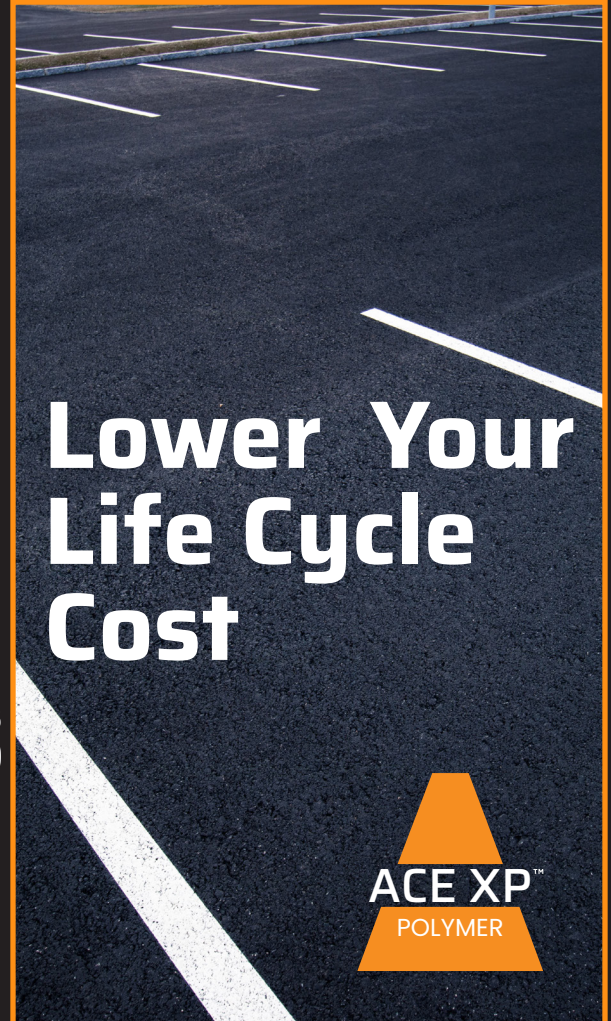

- Can be used by any asphalt plant
- Precision dosing ensures our fibers get in to your mix
- No special mix design needed
- Just add to your preferred mix
- ASTM Standard # D8395-23

Sustainability

- EPD certification - Ultra low carbon additive
- No more than 0.67 kg CO₂ / US Mix Ton.
- Meets corporate sustainability and ESG commitments
- Listed in Emerald Eco Label (NAPA's verified EPD tool)

Cost Savings

- Longer pavement life
- Deferred maintenance costs
- Lower life-cycle cost

The Results

ACE XP™ saves you money, reduces truckloads and emissions, minimized downtime and provides a better performing, crack resistant product.

Your fiber reinforced pavement will require less maintenance over its lifespan, reducing its Co2 footprint.

When replacement is necessary, the asphalt and fiber product is 100% recyclable.
